

FORESEE MINOR RELEASE NOTES

DECEMBER 2016

FEEDBACK

PDF Export

The See Respondents page now offers a Portable Document Format (PDF) file version of the displayed data in addition to the existing Comma Separated Values (CSV) file export.

Event Logging

Feedback now offers Event Log data through the Application Program Interface (API). See the [EVENT LOGGING](#) page of the Developer Portal for additional information.

Privacy Policy

Due to legal reasons, the Privacy Policy link displays ForeSee privacy policy only.

TEXT ANALYTICS

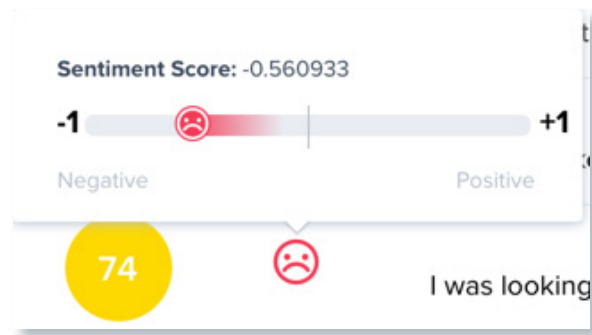

Keyword Search

Users can now search for a single word using the Keyword Search text box. Keyword search impacts data in all Text Analytics cards, such as Word Cloud, Top Keywords, and Comment Card. This search feature can also be triggered by clicking on a keyword in the Word Cloud or Treemap.

Quick View of Sentiment Score

Hovering over the Sentiment icon of a response displays a small dialog with the exact Sentiment Number on the full scale.

Download PPT

PowerPoint Export downloads each report card to a separate slide in a PowerPoint deck. Measure, Date Range of report, and metadata of the user initiating the export is listed in the slides, along with the ForeSee logo.
